# VISPRING

## launches limited edition *Charlotte bed*

Vispring, the luxury British bed maker has unveiled Charlotte, a new limited-edition bed that epitomises the brand's dedication to design, uncompromising quality and sustainability. Fusing classic and modern design aesthetics, the Charlotte bed includes a handcrafted all-natural mattress and cushioned headboard, paired with a contemporary design bedframe, with either a slatted or divan base. Offering a harmonious blend of comfort and style, the Charlotte bedframe and mattress can be purchased together or separately.

Crafted by hand at Vispring's factory in Plymouth, UK, the Charlotte mattress is filled with a sumptuous mix of locally sourced Exmoor Horn wool and TENCEL™ - a sustainable fibre, produced

from tree pulp. Exmoor Horn wool comes from the Exmoor Horn sheep, one of Britain's oldest native sheep breeds that graze the upland areas of Devon and West Somerset, close to where Vispring beds are made. A diet of rough heather moorland means it produces a soft, springy fleece, perfect for creating Vispring's signature cloud-like comfort. The Charlotte mattress also features hand-nested calico pocket springs and is available in four tensions: soft, medium, firm and extra-firm.

For the ultimate Vispring luxury, the Charlotte bed offers a range of exquisite fabrics from the Timeless and Natural Collections, allowing customers to create truly bespoke bed designs for a personalised sleeping experience. Further customisation includes choosing from three metal leg finishes suitable for a range of bedroom interior schemes. ●
